**Bell & Gossett Wins AHR Expo Innovation Award For New  
Energy-Efficient Variable Speed Pump Controller**  
*The Technologic<sup>®</sup> 502 Awarded Honorable Mention*

**MORTON GROVE, Illinois, November 23, 2009** — ITT Bell & Gossett has won a prestigious 2010 AHR Expo Innovation Award for its new Technologic<sup>®</sup> 502 variable speed pump controller.

The Technologic<sup>®</sup> 502 was among a very select group of new products to receive the “Honorable Mention” designation from hundreds of new products considered. Product entries were judged for innovation, application, value to user, and market impact. The winners will be honored at a special ceremony during the AHR EXPO in Orlando, on January 26, 2010.

The Innovation Awards are jointly sponsored by the American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE); the Air-Conditioning Heating and Refrigeration Institute (AHRI); and International Exposition Company (IEC), producers and organizers of the AHR Expo. A panel of judges made up of ASHRAE members selected for their exceptional knowledge of the industry made the final selections.

The Technologic<sup>®</sup> 502 is the latest generation hardware platform providing advanced pumping software and proven algorithms to create a smarter, more cost-efficient and energy-saving pump system for HVAC and pressure booster applications.

As part of Bell & Gossett's commitment to green energy-efficient solutions, the Technologic<sup>®</sup> 502 variable speed pump controller reduces its environmental impact through energy-saving efficiency and water conservation. The Technologic<sup>®</sup> 502 contributes to LEED certification and may also qualify for economic stimulus rebate or local power company incentives.

For more information, contact your local Bell & Gossett Representative or visit [www.bellgossett.com](http://www.bellgossett.com).

**About Bell & Gossett**

Bell & Gossett is a brand of ITT, the leading manufacturer of centrifugal pumps, hydronic specialties, heat exchangers, condensate handling equipment, and packaged systems for variable and constant speed pumping, heat transfer and pressure boosting.

**About ITT Corporation**

ITT Corporation is a high-technology engineering and manufacturing company operating on all seven continents in three vital markets: water and fluids management, global defense and security, and motion and flow control. With a heritage of innovation, ITT partners with its customers to deliver extraordinary solutions that create more livable environments, provide protection and safety and connect our world. Headquartered in White Plains, N.Y., the company generated 2008 sales of \$11.7 billion. [www.itt.com](http://www.itt.com)
