

# Check-Trol™

## Isolation Flow Control Flange

### Three features in one valve.

Check-Trol is the solution for circulator installations. Installing a Check-Trol on the discharge of the circulator gives you the features of a Flow Control Valve, Isolation Valve and Companion Flange. Another advantage of the Check-Trol is the minimal pressure drop, especially when compared to the losses that can be experienced when a check valve is installed internal to the circulator.

The Check-Trol flanges are packaged with an isolation flange of the same size to create a pair. Capscrews and nuts are included.

### Flow Control Valve

Prevents gravity circulation and flow in the wrong direction.

### Isolation Valve

Allows for servicing or replacement of the circulator without draining the system.

### Companion Flange

Free-floating companion flanges allow easy alignment for optimal handle positioning.

*Can be used with most circulators, including NRF/NBF/SSF wet rotors, Series PLs, 100, HV, PR and LR, and other manufacturers' pumps.*

*Available sizes: 3/4", 1", 1-1/4", 1-1/2" NPT and Sweat.*

**Patent Pending**
